WHARF AND WAVE.

The following is taken from the San Francisco Call. The vessel referred to recently arrived at Kahului. "Witness W. H. Graham in the case of the people vs. John Tyrrell, alleged dynamiter, is wanted by the police, but he is on his way to the South Sea islands on the schooner Maid of Orleans. For several days he has been anxiously looked for, but it was ascertained yesterday that he had taken French leave as mentioned."

The French cruiser Duchaffault will leave tomorrow morning for the South Seas. Her stores were taken on board on Saturday.

The U. S. steamer Albatross left

Mare Island on the 14th inst. to join the vessels of the Behring Sea fleet. She did not stop at San Francisco, but put directly to sea. The steamers leaving today are the Iwalani, at 5 for Kauai ports; the James Makee, for Kapaa at 4; the Kaala, at 3, for Lahaina, and the Mokoli, at 5, for Molokai.

The barkentine George C. Perkins arrived at Kahului before the Claudine left. She came down in twelve days and brought a paper of the 15th with her.

A late San Francisco paper says the barkentine Discovery is at the Union Iron Works dock preparing for a voyage to Laysan Island for a load of guano.

The Australia departed on Saturday with a very heavy passenger list. A very large crowd of people was on the dock to see her pull out.

The Kinau returned on Saturday without a bag of sugar. The rough weather along the Hawaii coast would not permit her to load.

The bark Albert left for San Francisco on Saturday with a full cargo of sugar and a number of passengers.

The barkentine Charles F. Crocker left Hilo on the 20th inst. with a cargo of sugar, valued at \$91,307.12.

A barge containing coal for Admiral Walker's surveying party will be towed to Pearl Harbor today.

The ship Occidental has been moved to the Oceanic wharf from the stream to be loaded.

The U. S. cruiser San Francisco, from Rio, arrived at Bluefields on the 14th inst.

The Claudine arrived from Maui yesterday with a very light passenger list.

The barkentine S. N. Castle will not commence to load for two weeks yet.

Daily ADVERTISER 75 cents a month.

The Saving of Life At Sea.

Mr. Cuthbert Gardner, of Red-ear, has not only invented a new lifeboat, but also improved patent davits by which boats may be safely detached from ships in case of accident. A trial of the davits took place recently at Messrs. Brown Brothers' Ironworks, Stockton-on-Tees, where they were manufactured, and the trial was of the most satisfactory character. The davits are placed on a skeleton framework of iron placed, when fitted to the vessel, between the bulwarks and the sides of the engine-house. The framework is sufficiently high to allow of the passage of a man along the deck beneath. By a simple system of cranks the boats are lowered from or raised by the davits, which are also made to work to and fro on the framework. Assume that a vessel is sinking, so that it is necessary for the passengers and crew to leave, all except the men required to work the davits get on board the boats, and when the boats have been lifted from their chocks to the outer edge of the framework, the men working the cranks on the upper part of the framework easily step in, and as soon as the boats reach the deck level the men working the lower cranks can also board them. Patent clip hooks, with steel ropes, are attached to the boats, and by this means the boats can be lowered at will. This is a great advantage when we consider the fact that many boats are swamped or capsized through the use of imperfect means of regulation. With Mr. Gardner's invention the occupants of the boat can watch for a comparatively favorable state of the sea, and then at once detach their craft. Thus there need not be any of the scrambling or haphazard work which so often causes loss of life when crews and passengers are leaving sinking vessels. If the boats used should happen to be Mr. Gardner's indestructible lifeboats danger is practically obviated altogether. The boats are adapted to ship's use as well as to coast service.—Exchange.

England to Build 120 Warships.

One hundred and twenty new warships will be added to the British navy, or their construction begun, according to the Admiralty's program. The list comprises thirteen iron-clad warships, thirty-seven cruisers, sixty-four torpedo destroyers and six sloops. The estimates for 1894 exceed those of 1893 by \$15,630,000—the total expenditure being fixed at \$86,830,500.

The ADVERTISER is the leading paper of the Hawaiian islands. It has a larger circulation and prints more live news than any other island paper. Price 75 cents per month, in advance. Ring up telephone No. 88

Shipping.

OCEANIC STEAMSHIP CO

Australian Mail Service.

For San Francisco:

The New and Fine A1 Steel Steamship
"ALAMEDA"
Of the Oceanic Steamship Company will be due at Honolulu, from Sydney and Auckland, on or about

MAY 3d.

And will leave for the above port with Mails and Passengers on or about that date.

THE TAGAWA COAL MINE!

is located in Fukuoka Ken in the Island of Kinsui, Japan, and was discovered about twenty years ago. It was owned by the government and mined simply for the government's use.

Great improvements, however were made since it was sold to a corporation about six years ago, by importing mining machinery from Europe and America.

TAGAWA COAL

is used more than any other Japanese coals in the following countries: China, Manila and Strait's Settlements. It has found its way even to Bombay.

Two cargoes have been imported into the Hawaiian Islands recently, and it has no superior in this market as stove or steam coal.
